DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-18 of U.S. Patent No. 6,675,240. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite means or steps that are substantially the same and that would have been obvious to one of ordinary skill in the art.

3. Claims 1, 9, 17, 22 and 27 essentially repeat all the features listed in claim 1, 8 and 15 of U.S. Patent No. 6,675,240 with the exception that claims 1, 9, 17, 22 and 27 of the instant application does not recite the limitations of: dynamically instantiating said new function if a performance criteria for said electronic device is satiated.

The omission of an element with a corresponding loss of function is an obvious expedient.

4. Claims 3, 23 of the instant application are identical to claim 1 of U.S. Patent No. 6,675,240.
5. Claims 2-8 and 24-26 of the instant application are identical to claims 2-7 of U.S. Patent No. 6,675,240.
6. Claim 11 of the instant application is identical to claim 1 of U.S. Patent No. 6,675,240.
7. Claims 10-16 of the instant application are identical to claims 9-14 of U.S. Patent No. 6,675,240.
8. Claims 18 and 27 of the instant application are identical to claim 15 of U.S. Patent No. 6,675,240.
9. Claims 19-21 and 28-29 of the instant application are identical to claims 16-18 of U.S. Patent No. 6,675,240.
